Live Stock  
AND  
Animal Products Statistics  
1909-1919.

(Prepared in collaboration with the Department of Agriculture, Canada.)

OTTAWA  
THOMAS MULVEY  
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY  
1920.

[No. 17c—1921.]

## PREFACE.

The present report on the live stock and allied industries in Canada is the first of a proposed series, and is designed to present a general review of production and trade during the period of the war, with sufficient pre-war data to afford a basis for comparison. At the present moment, in view of the abnormal conditions created by the war, special need exists for the study and development of these important industries, and the object of the report is to assist such study. As above intimated, supplementary reports will be issued bringing the information to date from time to time, and thus placing the statistics of animal husbandry and contingent industries on the same basis as those which have been organized for grain production and the grain trade.

Materials for the report have been derived from various sources. With regard to the basic data, the Dominion Bureau of Statistics obtains through the decennial and quinquennial censuses a statement of live stock on farms and of the natural increase or decrease thereof and of animal products during the census year, together with a record of the sales and consumption of the same on farms. These records are maintained annually during intercensal periods by co-operative agreement between the Bureau and the Departments of Agriculture of the several Provincial Governments, under which agreement an estimate of the number of live stock on farms is made annually in the month of June, and a record of the condition of live stock maintained throughout the year. With regard to the manufactures based on live stock, an annual census is compiled by the Bureau of slaughtering and meat-packing establishments, dairy factories, tanneries, and other similar concerns. From the trade aspect, the interprovincial movement of live stock, meats, etc., is broadly recorded from month to month in the Bureau, where also the statistics relating to the imports and exports of live stock and animal products are prepared for publication monthly. A monthly report from each cold storage concern in Canada is also filed in the Bureau, showing stocks of meats, fish, poultry and dairy products on hand. The Bureau also maintains comprehensive monthly or weekly records of the prices obtained by producers and the wholesale and retail trade in live stock, meats, cheese, butter, eggs and other animal products.

The above records are supplemented in the present report by data obtained from the Health of Animals Branch, Department of Agriculture, Canada, showing slaughterings in inspected establishments under the Meat Inspection Act. The branch also supplies the Bureau with the bills of lading filed by their inspectors, which throw additional light on the shipments of meats and other products from inspected establishments. Valuable data relating to the marketing of live stock are also obtained from the Live Stock Branch of the Department of Agriculture, Canada, which maintains through representatives at the various stock yards a complete weekly record of receipts, shipments and prices, with statistics showing the origin of receipts. Both of these branches have co-operated in the preparation of the present report.

Other materials in the report have been derived from the records of the Canada Food Board, the statistics for which were compiled in the Bureau, and from those of the Acting Cost of Living Commissioner of the Department of Labour, whose duties have passed to the Board of Commerce. The data regarding the trade of foreign countries have been in the main derived from the official reports of those countries.

The work has been carried out in the Internal Trade Division of the Dominion Bureau of Statistics under the direction of R. J. McFall, Ph.D., Chief of the Division, who during 1918 also acted as Statistician for the Food Board and as Acting Cost of Living Commissioner.

R. H. COATS,  
Dominion Statistician.

DOMINION BUREAU OF STATISTICS,  
April 27, 1920.

## TABLE OF CONTENTS.

	PAGE.
PREFACE.....	3
INTRODUCTION AND SUMMARY.....	7
TABLES.	
I. LIVE STOCK.	
(A) Sources of Supply—	
Table I. Numbers of Live Stock in Canada by Provinces and years 1909-18.....	11
Table II. Farm Values of Live Stock in Canada by Provinces and years 1909-18....	12
Table III. Average Farm Value per head of Farm Live Stock by Provinces and years 1909-18.....	13
Table IV. Animals on Farms and Field Crops, 1910-1918—Index numbers showing relative progress of different branches of Agriculture.....	14
(B) Distribution—	
Table V. Live Stock Yard Receipts and Shipments 1917-1919—	
(a) Weekly Receipts.....	19
(b) Summary of Receipts and Disposition by calendar years.....	31
Table VI. Origin of Live Stock Yard Receipts by Districts and Provinces 1917-19....	34
Table VII. Interprovincial and Markets Shipments of Live Stock.....	40
(C) Slaughtering—	
Table VIII. Live Stock Slaughtered at Canadian Inspected Establishments by Fiscal Years 1912-13 to 1919-20.....	42
II. MEATS AND DAIRY PRODUCE.	
(A) Production—	
Table IX. Slaughtering in Packing Houses and Abattoirs and Output of same—Industrial Census 1917 and 1918,.....	48
Table X. Production and Value of Products in Creameries and Cheese Factories 1915-18.....	50
(B) Stocks in Storage—	
Table XI. Stocks of Foods on hand at specified dates in cold storage and in process of cure by months, provinces, and commodities, January 1, 1918, to January 1, 1920.....	52
(C) Distribution—	
Table XII. Statement of Interprovincial and Markets Shipments of Meats, in detail by districts of origin and destination, October 1-December 31, 1916, and calendar years 1917, 1918, 1919.....	58
Table XIII. Summary of Interprovincial and Export Shipments by fiscal years 1917-18 and 1918-19.....	74
(D) Consumption—	
Table XIV. Canadian Domestic Sales of Produce, July-December, 1918.....	76
III. INTERNATIONAL MARKET SITUATION.	
Table XV. Meat Supply in Principal Countries.....	79
Table XVI. Foreign Trade of Canada in Live Stock—	
(a) Exports and Imports by Numbers, fiscal years ending March 31, 1909-19.....	84
(b) Exports and Imports by Values, fiscal years ending March 31, 1909-19.....	85

## CHARTS.

## (A) ANIMALS ON FARMS—

1. Canada's Rank as a Cattle Producer.....	105
2. Canada's Rank as a Sheep Producer.....	106
3. Canada's Rank as a Swine Producer.....	107

## (B) MONTHLY COLD STORAGE HOLDINGS—

4. Beef.....	108
5. Pork.....	109
6. Mutton and Lamb.....	110
7. Poultry.....	111
8. Fish.....	112
9. Oleomargarine.....	113
10. Butter.....	114
11. Cheese.....	115
12. Eggs.....	116
13. Frozen Eggs.....	117
14. Eggs, other than Cold Storage.....	118

## (C) ANNUAL BRITISH IMPORTATION OF MEATS AND PRODUCE, SHOWING ALSO CANADA'S NET EXPORTS AND BRITISH IMPORT PRICES, 1900-18.

15. Beef.....	119
16. Pork.....	120
17. Mutton.....	121
18. Wool.....	122
19. Butter.....	123
20. Cheese.....	124
21. Eggs.....	125

## (D) UNITED STATES FOREIGN TRADE IN MEATS AND DAIRY PRODUCE, SHOWING ALSO WHOLESALE PRICES AT PRINCIPAL MARKETS COMPARED WITH DUN'S INDEX NUMBERS 1895-1918.

22. Beef.....	126
23. Pork.....	127
24. Mutton and Lamb.....	128
25. Butter.....	129
26. Cheese.....	130
27. Eggs.....	131

## (E) COMPARISON OF LIVE STOCK RECEIPTS AT PRINCIPAL MARKETS WITH PRICES—

28. Cattle.....	132
29. Swine.....	133

# LIVE STOCK AND ANIMAL PRODUCTS STATISTICS 1909-1919.

---

## INTRODUCTION.

It is impossible to condense all the statistical material herein contained to a summary. Much more is it impossible to present a description of all the material. It is advisable, however, to draw brief attention to a few of the more interesting features of each section, with notes as to the source of information in each case, leaving it to students of this vitally important industry to make their own deductions.

## HISTORICAL SURVEYS.

Tables I and II present an historical survey of the various classes of live stock by provinces, showing the numbers and total value of each class in each province and the whole Dominion, while Table III presents the average unit value of the same. These tables are a valuable historical record of the actual numerical situation during any one year in any one section of the country and present valuable comparisons between the various provinces. Table IV which presents the index numbers for the numbers of live stock during these years and shows the index numbers for the changing production of cereals and other field crops on the same basis tells a still more striking story. These index numbers are based upon the average of the first half decade period in the survey and show in a striking manner not only the annual changes in the various phases of agriculture but the relative change between phases as well. A study of these tables for the provinces is perhaps the most interesting.

## STOCKYARD RECEIPTS.

Tables V, VI and VII are compiled from the records of the Live Stock Branch, Department of Agriculture. Table Va shows the weekly movement into the live-stock yards. These figures are particularly valuable to all interested in the marketing of live stock when compared with the monthly prices for the animals as shown in Table XVIII. This material is put in readily comprehensible shape in the charts 28 and 29. Table Vb summarizes the receipts at these various markets and shows what becomes of the animals after they arrive on the market, tracing them to the packers, the smaller butchers, the country for further feeding, and as exports to the United States. Unfortunately for the completeness of the survey, large numbers of hogs are marketed or sold other than through the live-stock yards. This is not noticeably true in the case of other animals, and, even in the case of hogs, the complete public marketings, excepting local killings, can be arrived at by referring to Table VIII, which shows the complete number of animals slaughtered in all inspected establishments in Canada.

### LIVE STOCK ORIGINS.

Table VI is derived from the records of the Live Stock Branch and was prepared in that office. It will be noticed that no record is shown for hogs. This is due to the fact mentioned above that only a portion of the hogs marketed go through the yards, and, since the data are gathered at the yards, a very misleading idea would be given were only this portion of the marketings of hogs shown by geographical origin. Many other hogs than those on the records of the yards originate in these districts and are sold direct to local and outside buyers. For those wishing the data on the origin of this limited portion of the hogs the records of the branch are open. The data on the other animals are reasonably complete.

### INTERPROVINCIAL SHIPMENTS OF LIVE STOCK.

The records showing the interprovincial and markets shipments of live stock are new and data are only available for the year 1919. Shipments shown are only those through the principal live-stock yards. This information is given in Table VII.

### SLAUGHTERINGS.

Table VIII has been prepared in the office of the Veterinary Director General and is based upon the reports of their inspectors. That this covers a large proportion of the total slaughterings may be gathered from the fact that no meat may be shipped from province to province excepting from inspected establishments and it is a patent fact that a very large portion of the meat to-day is slaughtered by concerns which conduct an interprovincial business. The total killings in these establishments are shown, and the number of animals "condemned" as unfit for food, the remainder, or difference between these, being marked "Canada approved" by the inspectors. These slaughterings are shown monthly to give the readers the complete facts as to the seasonal character of the slaughterings.

### PRODUCTION OF ANIMAL PRODUCTS.

Tables IX and X show the annual production of meats and dairy products as compiled in the Census of Industry for those years available. The quantity in pounds and the value of the animals and other products going into the packing houses are also shown.

### STOCKS IN STORAGE.

The statistics of foods in storage were collected by the Cost of Living Branch of the Labour Department until September, 1919, when the work passed to this Bureau. The classification of these commodities was incomplete in the early months, all meats in process of cure being included with meats in cold storage. It is not usual to include such stocks in process of cure in visible supply statistics, but the information is valuable when the separation and description is made. Statistics regarding storage and other stocks are peculiarly subject to misinterpretation when presented with too little auxiliary information. The proper study of this material is in the light of comparisons between one period and another and together with the data on seasonal production and consumption. A figure of 25,000,000 pounds of butter in storage in November appears large to a population paying a high price for that commodity, but wears a different aspect when it is realized that the major portion is produced in the early summer and is in equal demand throughout the year. A brief study of

## SESSIONAL PAPER No. 17c

the charts of the monthly holdings of these commodities is sufficient to show that the main function of storage is to act as a reservoir to steady seasonal marketings. The holdings of other commodities are not so easily explained, but a careful study of all available data as to supply and demand must be made. The presentation of this material covering a period of time, and especially the charts exhibited, should help towards a better understanding of this vexed problem.

## INTERPROVINCIAL SHIPMENTS OF MEAT.

The data on interprovincial shipments of meats are new. This material is based upon a compilation made from the bills of lading of all such shipments made in Canada. The law requires that these bills of lading must be supplied to the Veterinary Director General for all meats shipped out of inspected establishments; and, since all concerns doing interprovincial business must have their establishments inspected, theoretically these data must be complete on all such shipments. The bills of lading, however, are sometimes difficult to decipher, and various kinds of meats and edible and non-edible offals will be entered as a lump shipment. Complete comparability with statistics gathered by other methods is not therefore to be expected, though it may be pointed out that the only figures for which comparable data gathered on a different basis is available, viz., the customs returns, show only a small percentage of difference. The classification is not quite on the same basis and the "hold-over" or "suspense account" in the gathering of the two reports is different. Taking a two-year period the following comparison is shown:—

	Beef and Veal.	Pork Products.	Mutton and Lamb.	Total.
1917-19 customs figures of exports.....	213,678,398	380,371,228	2,788,825	624,401,792
1917-19 bills of lading of exports.....	222,281,103	390,004,442	2,048,015	632,142,594

The percentage of error is small, particularly in the case of the total where different methods of classification make the least impression.

These tables show not only all movements from province to province, but show as well the distribution from each slaughtering centre, as all inspected establishments report all shipments to their own province. The export figures are also shown by provinces and chief cities. The only opportunity for comparison here with the customs figures is in the case of the totals for the Dominion.

## CONSUMPTION DATA.

The next section presents material gathered by the Licensing Division of the Canada Food Board, to which each wholesaler was required to report all stocks on hand (including a separate statement for goods in transit), and his purchases and his sales, the latter subdivided to show whether or not the sale was in the wholesaler's own city and whether it was to a wholesaler or a retailer. Sales to retailers cover goods destined directly for consumption, but goods sold to wholesalers are being turned over within the trade. The latter are transfers; the former are practically consumption figures and show what the Dominion and each part thereof was actually using, this, of course, referring to real commercial sales and not to goods consumed in the rural locality of origin. This work was started in May, 1918, and it took some time to secure reports of statistical value. The reports for November and December, 1918, immediately preceding the dropping of the work were regarded as sufficiently accurate to furnish a most valuable estimate of commercial consumption by which to interpret the storage figures presented elsewhere.

## INTERNATIONAL SITUATION.

The international market situation is a feature of special importance to Canada to-day. For this reason the export figures for Canada are reproduced in summary form and also the chief facts in regard to the present live-stock situation in other countries as compared with normal times—their normal consumption of meat and their imports and exports. More detailed studies are shown in the charts for Great Britain and the United States, to which we must look for our chief markets. Great Britain's annual importation is shown for all important animal products, with the unweighted average price thereof; the greater or less part which Canadian export trade plays in relation thereto is shown in parallel columns in Table XVII and in Charts 15 to 21 inclusive. Attention must be called to the striking decline in the net export of most of our animal products in the half decade before the war. This was a period of railroad building and expansion in the West and the decline in animal products was offset by a gain in the export of cereals. The surplus which the United States has offered the world and her ruling prices are also shown in a series of charts. A study of these materials shows at once the extent of the American market for animal products, and the fact that, except for the increase during the war, the United States is rapidly approaching the time when her surplus will turn to a deficit necessitating purchases from outside. The trend of United States prices for such commodities, especially as compared with prices in general, is also of marked interest.

## PRICES.

The important factor of price is fully presented. Reference has already been made to certain selected parts of this material, but comprehensive tables have been included showing the prices of animals and animal products in all chief centres for a series of years.

TABLE I.—Numbers of Farm Live Stock in Canada by Provinces and Years.

\*NOTE.—Calgary and Edmonton are situated in districts 19 and 35 respectively. Cattle and other animals, brought in to the stock yards, may be kept in pasture pending favourable market conditions. When these animals are marketed, they are shown as originating in these districts although they have been shipped originally from outside points.

11 GEORGE V, A. 1921

TABLE XIV. Canadian Domestic Sales of Produce, July 1918 to December 1918 inclusive.

This table shows data derived from the license reports of the Canada Food Board, giving the sales of the wholesale produce dealers within Canada and each part thereof, as shown below to wholesalers and to retailers. The sales to wholesalers are regarded as transfers, but the sales to retailers show the quantities of these goods, going on for consumption through wholesale channels. In the case of the cities of Montreal, Toronto and Winnipeg we are able to show the sales to other dealers in these cities consequently the sales to retailers in these cities show the consumption of these foods in these same cities in these months. The total sales made by the wholesalers in these cities are also given; from these may be gathered an idea of the total trade in these goods, by these city wholesalers. The difference between such total trade and the trade to other dealers in the same city shows the trade of that city with outside points.

\* Canadian Exports and Imports of Live Animals—Average 1912-14.

Population figures used in estimating total present consumption are from World Almanac, 1918, except in case of New Zealand, Australia and Canada. New Zealand and Australian figures are from Statesman's Year Book, 1917, and Canadian figures from Canada Year Book, 1918. Per Capita Consumption figures are from Bulletin 109 published by United States Dept. of Agriculture.

Numbers of Animals on Farms are taken from Annuaire of International Institute of Agriculture.

Pre-War Foreign Trade Figures are from original trade records of countries in question.
